

01-20-1984, p. 3

then took his leave. I have the impression that he was off to a party somewhere, although he didn't say where he was going. Paul, Jim, Ed & Ray left about 945 PM and I was left to cleaning, and to finish painting one of the windows in 303. I must say that I was very annoyed and irritated to be left holding the bag, so to speak. No one else takes the restoration of City Hall as seriously as I do. No one else is as committed to the project as I am. Historical preservation is a very high priority in my life. In most peoples' lives it is a very very low priority, if a priority at all. That is a fact that I must remember when I find myself the only one who is willing to take a stand on behalf of Carbondale's past. My day will come / my day will come. at 1015 PM I left City Hall and returned here and prepared something to eat. I sat in the Library and listened to Tristan and Isolde, with Nilsson, and that put me back on the track. Vers munit, je me suis retué.

I spent about 3½ hours co mation organizing and collating the printed pages of PN II. Thousands of pages have to be ordered and spread out hundreds of pages all over the house -- kitchen table, dining room table, window seat in the dining room, the table in the den, three bridge tables, the front stairs. New pages exist in 4 copies at the moment and I have to put all 4 copies together and then put them in order. I have the following sections pretty well done: WSP, GLRP, WWP, JRP. Remaining to do are: DWP/SAP/RTP, DWP, SRP, and Brookvalley. I will get the job done and have the volume ready for microfilming and binding this year.
